# Hot AC Listeners Have Highest Income

According to a recently released National Radio Format Report from The Media Audit, Hot AC listeners have the highest average household income compared to the top ten highest reaching commercial radio formats. The average household income for a Hot AC listener is \$77,625, compared to the market average of \$63,505. Additionally, the study reveals that listeners to Hot AC are 48% more likely than the general market to earn an income above \$100,000 and 38% more likely to earn more than \$150,000. Listeners to this format account for 7.2% of all adults 18+ and the format ranks as the tenth highest reaching format in the country. The 2005 study aggregates radio audience data from 85 markets and includes surveys that were conducted between January 2005 and March 2006.

According to the study, 60% of Hot AC listeners are female. Listeners are nearly twice as likely compared to the market to be working women with an average household income more than \$75,000, and 39% more likely to be college graduates. The study also reveals that nearly three-quarters of the format's listeners are between the

ages of 25 and 49 and listeners are 27% more likely to have children living at home.
