Hot AC Listeners Have Highest Income

According to a recently released National Radio Format Report from The Media Audit, **Hot AC listeners have the highest average household income compared to the top ten highest reaching commercial radio formats.** The average household income for a Hot AC listener is \$77,625, compared to the market average of \$63,505. Additionally, the study reveals that listeners to Hot AC are 48% more likely than the general market to earn an income above \$100,000 and 38% more likely to earn more than \$150,000. Listeners to this format account for 7.2% of all adults 18+ and the format ranks as the tenth highest reaching format in the country. The 2005 study aggregates radio audience data from 85 markets and includes surveys that were conducted between January 2005 and March 2006.

According to the study, 60% of Hot AC listeners are female. Listeners are nearly twice as likely compared to the market to be working women with an average household income more than \$75,000, and 39% more

likely to be college graduates. The study also reveals that nearly three-quarters of the format's listeners are between the ages of 25 and 49 and listeners are 27% more likely to have children living at home. Because of their income, education and family status, the audience is highly desirable for advertisers representing luxury automobiles, real estate, travel and leisure, and health and beauty. For example, listeners are 25% more likely to be purchasing a new vehicle in the next 12 months, and 27% more likely to spend more than \$30,000 on the purchase. Hot AC listeners are also 30% more likely to work out regularly at a health club and 34% more likely to be seeking cosmetic surgery.
